

INBOOKS USERS

POWER VS WEB

INBOOKS runs on a Concurrent User model. To understand how this works, review these explanations and the examples on the next page.

WHAT ARE CONCURRENT USERS?

Concurrent Users refer to the number of system users that are able to be using the software **at the same time**.

With INBOOKS, **you can add an unlimited number of user accounts to the system** - whether they be imported from Active Directory or created within INBOOKS. However, only the number of concurrent users purchased with INBOOKS will be able to work within INBOOKS simultaneously.

01

POWER USERS

Users that are consistently working within the INBOOKS installed application on accounting or document-based processes.

02

WEB USERS

Users logging in to the web-based version of INBOOKS - likely to approve or view documents in the system.

?

SEPARATE OR COMBINED

Power and Web Users are separate. The concurrent user licenses attached to the installed INBOOKS application do not affect the web user licenses and vice versa.

INFODYNAMICS

EXAMPLES

5+Unlimited

This client is choosing to forgo INBOOKS WebSMART as they are a very small enterprise with only one approver. They have 5 concurrent power users and "unlimited" serves as a reminder that they can add an unlimited number of user accounts to INBOOKS.

5+10+Unlimited

This client has purchased 5 concurrent power users, 10 concurrent web users, and unlimited user accounts. There can be 5 users logged in on the installed INBOOKS application and 10 users logged in on the web at the same time.

5+50+Unlimited

This client has purchased 5 concurrent power users, 50 concurrent web users, and unlimited user accounts. This is suitable for their large corporation of members that need to view documents remotely on the web.

HOW MANY USERS DO I NEED?

For power users, we recommend thinking about the number of users that would consistently be working within INBOOKS on a daily basis.

- Power users are offered in packages of: 3, 5, 10, 15, 20, 25, 50, 75, and 100.
- If need be, for any user count of 30 or higher, we can customize the pricing in user counts of 5 (ie. 35, 40, 45, etc.)

For web users, determine the average number of users that would need to approve or simply view documents. Keep in mind that these users are concurrent as well!

- Web users are offered in packages of: 10, 25, 50, and 100.
